EDUCATION

Alpha college of Engineering

Chennai, TN

Bachelor's Degree- Information Technology. CGPA: 8.47

Sep 2023 – May 2027

- **Course Work:** Data Structures and Algorithms, Data Science, Database Management Systems, Object Oriented Programming, Operating Systems, Artificial Intelligence, Machine Learning, Computer Vision, Python Programming, Full Stack Web Development, OOSE, OOPS, Probability, Statistics, Linear Algebra, Calculus.
- **Miscellaneous:** Cyber security, Penetration testing, Vulnerability assessment, Generative AI, AI Agents, n8n.

EXPERIENCE

Intern

Jan 2026 - Present

eStride Digital.

Hybrid

- Built **n8n + LLM** workflows for automated lead generation, LinkedIn research, and CRM outreach.
- Engineered **JavaScript, Regex, and Node.js** pipelines for data parsing and workflow automation.
- Generated **SEO audits, PDFs, PPTs, and AI reports** using webhooks and automation systems.

Software Development Intern

Oct 2025 - Jan 2026

FlipFlex

Hybrid

- Developed **React JS, Java, Firebase, and Electron** applications for web and desktop platforms.
- Built **cashier and inventory management systems** with database integration and responsive UI design.
- Worked on **real-time client projects** involving full-stack development and application deployment.

Intern - Cyber security

Apr 2025

The Red Users.

Remote

- Performed **network threat analysis** and monitored suspicious traffic using Wireshark tools.
- Implemented **firewall, password hardening, and WPA2/WPA3** security configurations in lab environments.
- Gained hands-on experience in **cybersecurity fundamentals, phishing detection, and network monitoring**.

PROJECTS

Cyber security Threat Detection AI Agent Python, scikit-learn, Flask, n8n, Gmail API

Jun 2025

- Developed an **AI-based threat detection system** using Python, Flask, and machine learning models.
- Integrated **Flask APIs with n8n workflows** for automated alert processing and email notifications.

AI Medical Report Analyzer | Python, LLMs, Flask, React, OCR, render

2026

- Built an **LLM + OCR medical report analyzer** using Flask, React, and Python automation tools.
- Developed a full-stack platform for **medical report upload, processing, and AI-driven summarization**.

N7N | A cloned version of n8n automation platform

2026

- A **schema-driven node configuration UI** supporting conditional visibility and secure credential binding.
- A full-stack workflow engine enabling **complex API orchestration and scalable AI automation sequences**.

TECHNICAL SKILLS

- **Libraries:** Pandas, OpenCV, PyTorch, Mathplotlib, Numpy.
- **Tools:** Streamlit, Claude Code, OpenClaw, Antigravity, Nmap, Burpsuite, hydra, wifite, metasploit framework.
- **Others:** C/C++, Python, SQL, Git/Github, Kali Linux, Firebase.
- **Soft Skills:** Interpersonal communication, Problem solving, Creativity, Observation, Imagination.

ACHIEVEMENTS & PUBLICATIONS

- Published a paper titled **Dual-Agent Self-Refinement for Scalable Transcript-Based Summarization** in **IEEE Journal**.
- Published a Review paper titled **Machine Learning and Deep Learning Paradigms for Cancer Detection and Semantic Segmentation: A Critical Review** with an Impact Factor of 12.9.
- Published a paper titled **RAG-LLM Medical Report Analyzer: Simplifying Health Insights**.
- Top 6 out of 256 teams nationally in MinT 2026 by IIT Madras and Bosch and provided with funding support.
